● Make sure your device is API level 4.0 or higher.

● Download the APK. (Make sure downloading from places other than the Google Play Store is possible).

● Open Swapr.

● Create an account.

● Scroll through the items other users have uploaded. If you feel like the priced value is too high, downvote it. If you feel the opposite, upvote it! Not sure? Leave it as is.

● If you want more information (full description) on any item, you can click on the item image or text and you will be brought to an expanded view for details.

● You can swipe left and right to view and rate other items.

● To switch back to original view, simply click on the Swapr logo at the top left corner.

● Feel like you have items you want to swap? Hit “Upload an item”.

● Follow the steps, don’t leave anything out, and submit.

● Now that you have at least one uploaded item, you should be matched soon.

● Hit the notification button (top right corner).

● If you uploaded an item that’s been matched you’ll be asked to mail it to a provided address. Fill in a tracking code if you have one to provide and press “Sent” or press “Not sent” if you want to see other notifications.

● If you have a matched item, you’ll see a screen asking if you’ve received it. Hit yes or no.

● If you hit yes, you’ll be sent to a page that rates the item and in turn, the user who uploaded and sent it. Giving them a good rating will mean they receive good items in the future.
